Restaurant SetUp_ User Story Scenario

Manager User Story

Story: As a manager, I want to manage menu items so that customers can see updated offerings.

Main Scenario:

1. The manager logs into the system.
2. The manager navigates to the "Menu Management" section.
3. To add a menu item:
    ○ The manager clicks "Add New Item."
    ○ Fills in the name, description, price, and category.
    ○ Clicks "Save," and the new item appears in the menu.
4. To update a menu item:
    ○ The manager selects an existing menu item.
    ○ Edits the details (e.g., name, price, or description).
    ○ Clicks "Save," and the changes are reflected.
5. To view the menu:
    ○ The manager clicks "View Menu" to see all listed items.
6. To remove a menu item:
    ○ The manager selects an item to delete.
    ○ Clicks "Delete," and the item is removed from the menu.

Staff User Story

Story: As a staff member, I want to view orders so that I can fulfill customer requests.

Main Scenario:

1. The staff logs into the system.
2. The staff navigates to the "Orders" section.
3. The staff sees a list of all pending orders.
4. The staff clicks on an order to view its details (items, quantities, and instructions).
5. The staff updates the order's status to "In Progress" or "Completed" based on progress.

Customer User Story

Story: As a customer, I want to create an order to purchase menu items.

Main Scenario:

1. The customer logs into the system.
2. The customer navigates to the "Menu" section.
3. The customer selects items directly and confirms the order.
4. The system saves the order and displays the confirmed order details, including items, quantities, and total price.
5. The system provides a confirmation message.
